Messpected Lin; -I am proparing the manuscript for a second edition of my work on Our Matiro Ferns and How to Study Them" the first edition of which I know

lished in March 1881 and is now nearly sold out.

In my new edition I would like to include all the Yascular Cryptogams so as I extend the scope and useful ness of the work. I believe this has never been attempted as yet.

I am lacking descriptions of the following species:

Sortes Californica, Englin.

I sortes melanospora, Englin.

Marsilia Tenui Jolia Engreum.

Since these are all describes for you I thought forsibly you might be able to refer mer to the works where they are described of if you

Were willing would loan me the works containing descriptions of these species.

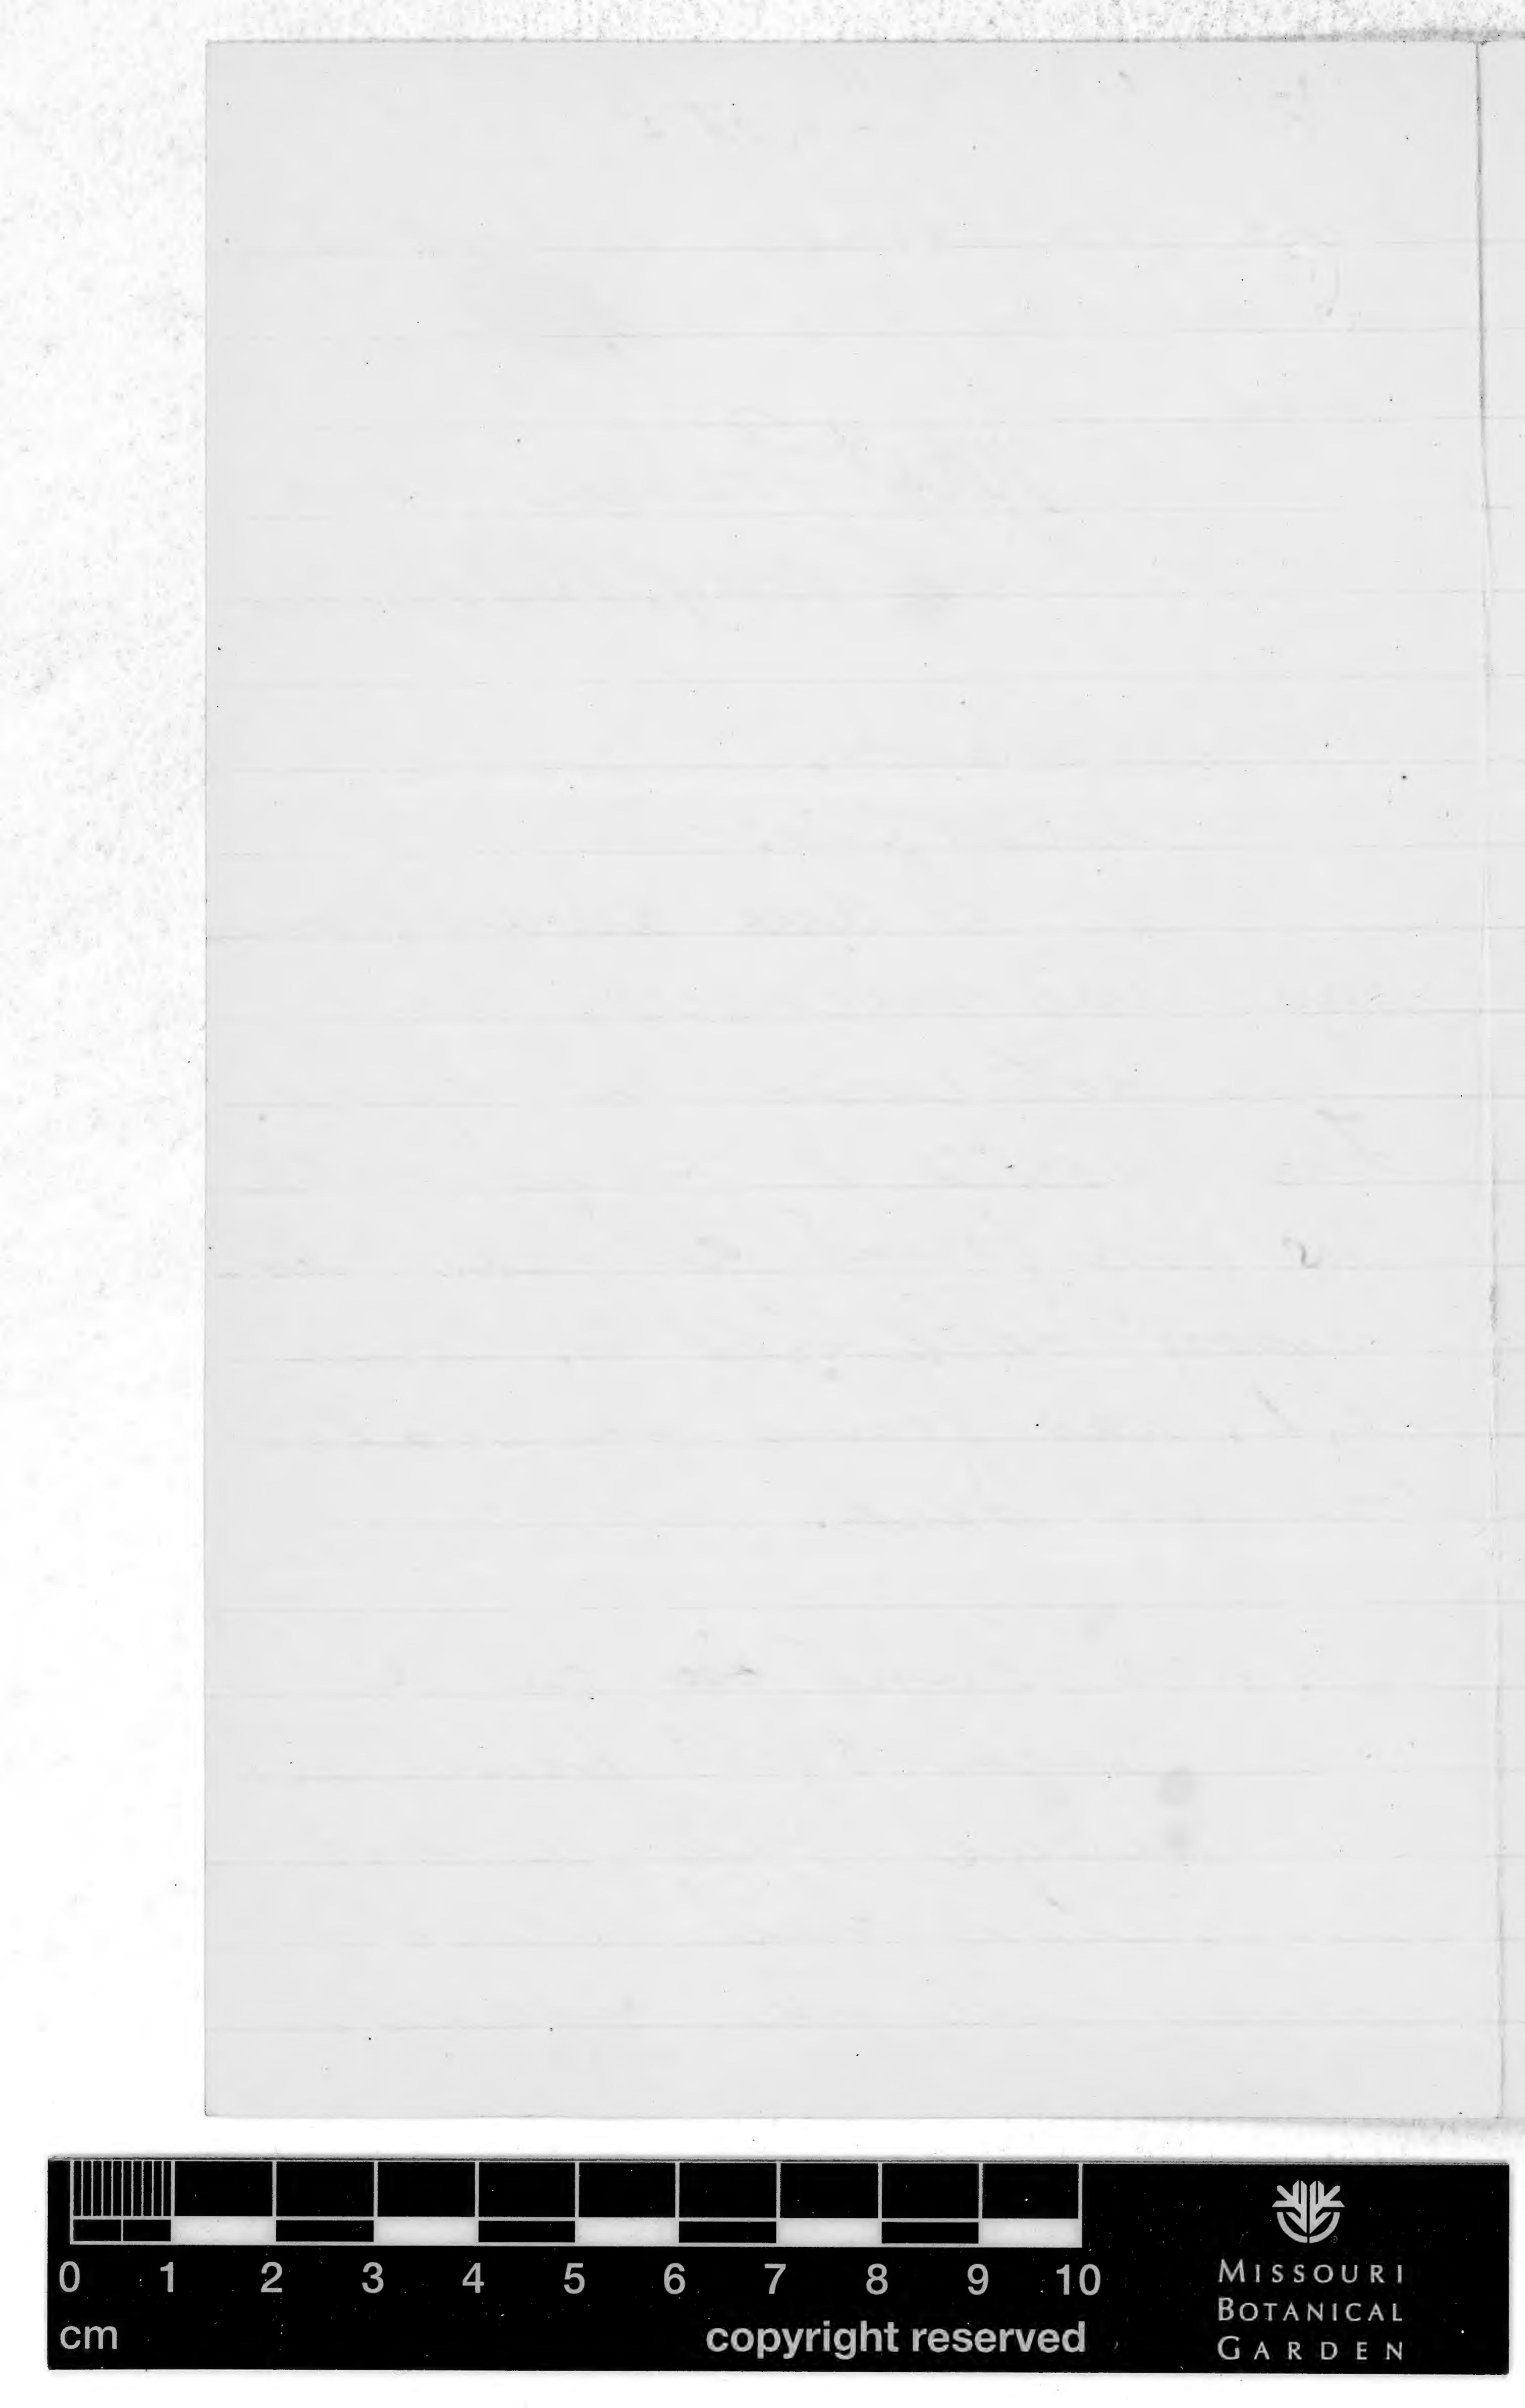

If you were willing I should be highly gratified if you would write up I'm your name Acourse) the Entire grane of Isoctes for the Edition I can assum you I expect nothing financially from this Edition as the first Edition has not yet paid Expenses, deserre however to make this work as complete and possible and would de pleased if your time and melmation would allow you to meet the above request. I mail you with this a copy of the first Edition that you may know about how fully I desire the Specific descriptions & DE. I would ask also if you consider Marsilia macropoda, Engelen as distinct from M. polycarpa, Hook, & Grev. " Ishall wait your answer with witing Respectfully Lucien M. Muderwood.
